

YOUR TORONTO HALLOWEEN DRY ICE SUPPLIER

TAKE YOUR HALLOWEEN EVENT TO THE NEXT LEVEL BY USING DRY ICE TO CREATE CREEPY FOG EFFECTS TO ENTERTAIN YOUR GUESTS, CHILDREN, AND TRICK OR TREATERS. SEE OUR GUIDE BELOW FOR A COUPLE OF CLASSIC HALLOWEEN EFFECTS USING DRY ICE

THE SMOKING PUMPKIN

Items Needed: Pumpkin, dry ice pellets, plastic bowl, knife for carving into pumpkin, large spoon or scoop, kitchen bowl, warm water, tongs, and gloves.

See the following guide for carving a pumpkin: www.wikihow.com/Carve-a-Pumpkin

Using the pumpkin, measure and cut out a lid making sure it's wide enough for you to place the plastic bowl inside the pumpkin. Remove the filling from the pumpkin (it's messy, so use the kitchen bowl or your compost bin to put it in), and then carve your design into it.

Take the plastic bowl and fill it 1/2 full with warm water. Place the bowl inside the pumpkin. Using tongs or your gloved hands, add 1/2 cup of dry ice to the bowl of water to produce the bubbling and smoke effect.

Replace the warm water and dry ice as needed to continue the effect. You should get 2-3 minutes effect at a time.

BUBBLING WITCHES BREW

Items Needed: Cauldron bowl or plastic halloween cauldron from Dollarama, dry ice pellets, warm water, tongs or scoop, and gloves.

Fill the cauldron no more than half way with warm water. Put in the position you want to display it, and add 3-4 pellets of dry ice to the water to start the fog effect. It takes a little experimenting to get it right but that's part of the fun. Replace the warm water and dry ice as needed. You should get 2-3 minutes effect at a time.

We recommend buying our [dry ice pellets](#) for these effects as you can easily control the amount you add. As a general rule, the hotter the water, the better the fog effect.

We can advise you on the amount to purchase if you have an idea of how long you want the effects to last. Call us on 416-252-7137 for more information.

PLEASE SEE IMPORTANT DRY ICE HANDLING INFORMATION ON REVERSE

DRY ICE HANDLING INSTRUCTIONS - PLEASE READ CAREFULLY!

Although dry ice is perfectly safe to use, there are certain precautions that should be taken when using it:

- ALWAYS wear protective gloves when handling dry ice as it has a surface temperature of minus 78 Celsius.
- Dry ice should only be handled by responsible adults - NOT CHILDREN.
- DO NOT put dry ice in your mouth or ingest it. DO NOT add it to drinks because the dry ice can be dangerous to your mouth and gastrointestinal tissue if swallowed.
- DO NOT put dry ice inside anyone's clothing or costume. Potentially severe frostbite may occur as a result of prolonged contact with the skin.
- DO NOT place dry ice in an airtight container. Sublimation of the ice will increase the interior pressure and will rupture (explode) the container. Store dry ice in the containment it comes in or use a standard camping chest cooler (see image).
- Food and liquid products placed in prolonged contact with dry ice will likely freeze.

A standard camping cooler is a perfect place to store dry ice.

If in doubt about any of the instructions above, please call us on 416-252-7137
